PRABHAKARAN PALANIMUTHU
Bloomington, IN (willing to relocate) | prpalan@iu.edu | Linked In | prabha-07.github.io | GitHub | +1(812)391-3906

An analytics engineer with 3+ years of experience in enabling realized impact across projects at enterprise scale.

EDUCATION

Indiana University Bloomington **Aug 2025-May 2027**
Master of Science in Data Science, CGPA: 3.9/4.0 *Bloomington, Indiana*

- Applied ML, Fund & App of LLMs, Engineering Cloud Computing, Applied Database Technologies, GenAI 101, Intro to Stats, Usable AI, Social Media Mining

Anna University (SSN College of Engineering) **2018-2022**
Bachelor of Engineering, CGPA: 8.2/10 *Chennai, India*

PROFESSIONAL EXPERIENCE

Student Worker, IT Analytics – Viatris Inc., Canonsburg, PA **August 2026 – Present**

- Integrating the demonstrated Proof of Concept (PoC) to existing **Synapse data pipeline** framework to catalyse the data migration.

Summer Intern, IT Analytics – Viatris Inc., Canonsburg, PA **May 2026 – August 2026**

- Developed and demonstrated a Proof of Concept (PoC) for a controlled **AI Agentic workflow** in **Azure Synapse Analytics** to replicate a standard **SAP extractor**, enabling data migration from **SAP Datasphere** to Azure Synapse Database.
- Created a **Microsoft Copilot Studio agent** in an internal project for integrating Outlook and SharePoint to help users regain context, recall information and resync with work.

Data Analyst - LatentView Analytics Ltd., Chennai, India **Sep 2022 – July 2025**

- Developed and managed comprehensive **Power BI** and **Tableau** dashboards from SQL tables to track and analyze marketing campaign performance and paid media trends across various channels including Search Paid, using **KPIs: CPA, ROMS/ROAS, CPM** that involve media **attribution** metrics, which enabled **weekly optimizations** worth **10% of a week's revenue**.
- **Generated insights** and analyzed the weekly revenue dip by conducting **root-cause analysis** and executing SQL queries in **Databricks**, uncovering pricing inconsistencies that led to a targeted pricing adjustment and helped stabilize revenue.
- Case Study on Ad Click Through Rate prediction, by establishing an **EDA** and building multiple **classification models** to present the influencing features for increasing **CTR** based on the best-proven model.
- Performed **A/B and Hypothesis testing** to compare the campaigns and tactics through results from statistical tests such as **Z-test and T-test**. Also enabled **20% YoY revenue growth** for a seasonal offer window of the client's product.
- Developed a **SQL pipeline** in **Databricks** using PySpark and Spark SQL to transform raw data through **ETL** (Extract, Transform, Load) into a unified source and used it to build and update Power BI/Tableau dashboards, which provide data-driven insights over the performance of regional and new campaigns and creatives across **Full Funnel and Bottom Funnel**.
- **Automated an Excel report** delivery directly through mail to the stakeholder from SQL query in Databricks, automation of several Business-as-Usual reports for auto weekly refresh through **ODBC**, which resulted in saving **2 hours** of time per day.
- Generated weekly reports from **RStudio** and dashboard migration from **Hive to Databricks** for both Power BI and Tableau. Also worked initially in Hive environment before Databricks for all Data operations.

PROJECTS

Built an **Agentic AI compliance auditing system** using adversarial multi-agent debate (Advocate–Challenger–Arbiter) with Retrieval Augmented Generation (RAG), improving audit classification performance by **+22 F1 points** over single agent baselines Link .

Executed building Data Engineering pipeline in snowflake notebooks from demo repo - Link

Applied ML Projects - Predictive Modeling for Powerlifting Performance Link , Multi-class classification: Softmax, SVM, RF, Ensemble and their evaluation Link , Dimensionality reduction (PCA, t-SNE, LLE, UMAP), clustering (K-Means, GMM) Link

Canal Discharge Prediction Using Time Series Analysis and Neural Networks (UG Project) - Link

CERTIFICATIONS

- NVIDIA Certified Associate Generative AI LLMs, by NVIDIA. View Certification **October 2024**
- Databricks Certified Data Engineer Associate, by Azure Databricks. View Certification **August 2024**

TECHNICAL SKILLS

Languages & Tools: Python, SQL, R, Power BI (Demo), Tableau (Demo), Adobe Analytics, MS Excel, JupyterLab, VS Code, GitHub, Databricks, Hive, Azure Blob Storage, Colab, Snowflake, Spark SQL, LM Studio, Anything LLM, Ollama, MS Word, MS Powerpoint, DAX, Power Query, Azure Synapse.
Tech & Concepts: Machine Learning, LLMs, Generative AI, PySpark, Apache Spark, Delta Lake, Lakehouse, Delta Live Tables, Data Pipelines, ETL, Agentic AI, Chatbots, Excel VBA, Data Visualization, Data Analysis, Business Intelligence, Dashboard Development

ACHIEVEMENTS & EXTRACURRICULAR

- Received the **Encore Award** from **LatentView Analytics Ltd**. For outstanding performance in April-July 2024
- Toastmasters' member and Active participant in **Corporate Social Responsibility (CSR)** activities at LatentView
